RHIF 5

IONAWR 25

DYFRIG

We have started the term with some fantastic narrative writing to add words to a picture book, *Once upon a Snowstorm*. We are becoming more confident using complex sentences, prepositional phrases and techniques like 'show, not tell.'

We are currently enjoying descriptive writing based on *Amazing Transport* where we are learning how to use technical vocabulary and also write definitions using complex sentences. We will soon be experts on how to drive a car!

It has been a busy and eventful start to 2025 in dosbarth Dyfrig. We are all super-excited about our visit to Treginnis next month and our inquiry, *Cynefin and the Countryside*, is building perfectly towards this. We have examined land use in our locality and sorted and classified trees native to our shores and beyond. We have become scientists, examining the pH of soil samples. We found food and household items across the scale. We then found ways to change the pH of solutions using acidic and alkaline base products.

We have been building on our knowledge of decimals, using them to add and subtract different units of measure. We have even been learning how to convert decimals to fractions and to use common denominators to compare them. We are seeing now how knowing our times tables supports all kinds of maths learning!

We Learn, We Play, We Care, We Pray.
